

Data Security Snapshot

Unlock a comprehensive understanding of your organization's data security posture with Symmetry's DSPM Assessments. Tailored to identify and prioritize risks in your cloud environment, our service is designed to fortify your data against evolving cybersecurity threats.

Data Inventory

"What data do I have?"

Cloud Asset Overview

Identify cross-account potential & scores data inventory risks.

Sensitive Data Analysis

Recognize data types, locations & dormancy periods.

Identity Inventory

"Who can access my data?"

Privileged Identities Evaluation

Assess 'any' permissions, dormancy & access to sensitive data.

Vendor and Third-Party Access

Scrutinize third-party access permissions & identify potential risks.

Timeline (1 meeting per week)

Kickoff

Share characteristics of your unique cloud environment and specific needs. Installation takes place guided by Symmetry.

Week 1

Get a first look at data security posture results. Work with our experts to narrow the scope of further investigation.

Week 2

Results are refined and organized into a read-out with sample evidence.

Deliverables

Expert Analysis

Walkthrough of key findings & discussion of remediation

Report & Action Plan

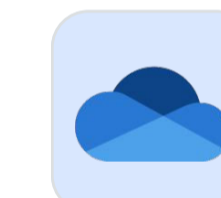

Detailed report with action steps for remediation (sample available)

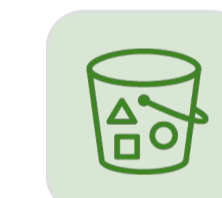

Remediation Data

Actionable evidence to resolve more complex challenges

Base

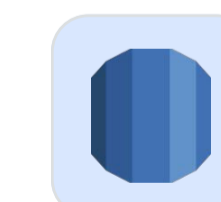

MS
OneDrive

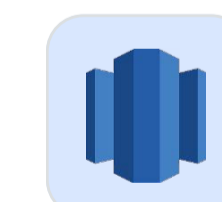

AWS
S3

Snapshot is intended for Microsoft OneDrive and AWS S3. Symmetry supports additional services on an individual basis.

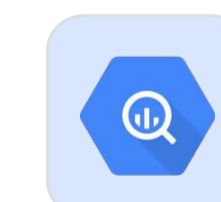

Premium (Your Cloud or SaaS)

Key Insights:

Accounts

- How many unknown accounts are in our cloud & hybrid on-prem environments?
- How many external accounts are in our cloud & hybrid on-prem environments?
- Do these external accounts have permissions to internal or production environments?

Data

- What types of sensitive data do we have?
- Where is our sensitive data stored?
- Who has access to sensitive data?
- Have there been operations taken on our sensitive data?

Identities

- How many are external identities?
- How many are dormant identities?
- How many privileged identities do we have?
- How many privileged identities are dormant?

Data Security Snapshot

Unlock a comprehensive understanding of your organization's data security posture with Symmetry's DSPM Assessments. Tailored to identify and prioritize risks in your cloud environment, our service is designed to fortify your data against evolving cybersecurity threats.

BUSINESS OBJECTIVE TIMELINE

Symmetry helps generate a bespoke plan for cloud environment remediation.

DATA STORE INVENTORY

Discover datastores in your environment and identify sensitive information based on out-of-the-box classification rules or company designated schema.

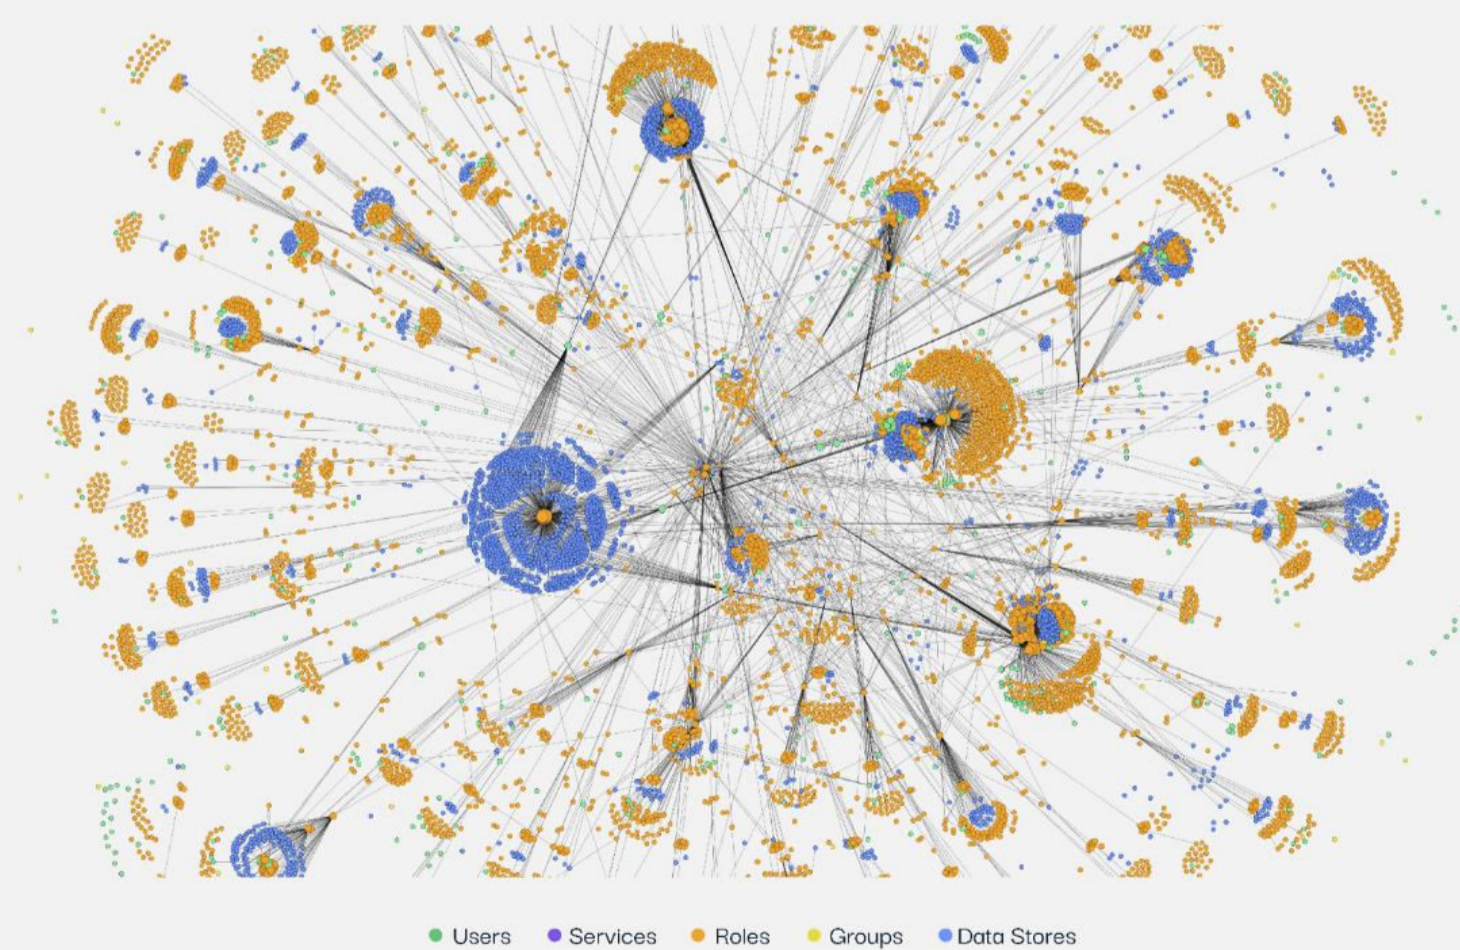

Disaster Recovery Backups

| | Data Store | Storage | Service Name | Last Accessed | Classified Data |
|----|---|----------------|----------------|---------------|-----------------|
| 1 | IT-D365-HORIZON-DEV | blob_container | azafahgjdkfrkn | 2023-03025 | True |
| 2 | IT-INFRASTRUCTURE-PRD | blob_container | azafahgjdkfrkn | 2023-03025 | False |
| 3 | WP-D365-HORIZON-DEV | blob_container | azafahgjdkfrkn | 2023-03025 | True |
| 4 | XSP8053\MICROSOFT\XSPI30053\XSPI222504 | blob_container | azafahgjdkfrkn | 2023-03025 | False |
| 5 | IT-D365-HORIZON-PRD | blob_container | azafahgjdkfrkn | 2023-03025 | True |
| 6 | Visual Studio Enterprise Subscription | blob_container | azafahgjdkfrkn | 2023-03025 | False |
| 7 | Visual Studio Professional Subscription | blob_container | azafahgjdkfrkn | 2023-03025 | True |
| 8 | Test-Subscription | blob_container | azafahgjdkfrkn | 2023-03025 | False |
| 9 | IT-INFRASTRUCTURE-DEV | blob_container | azafahgjdkfrkn | 2023-03025 | True |
| 10 | IT-INFRASTRUCTURE-DEV | blob_container | azafahgjdkfrkn | 2023-03025 | False |

ENVIRONMENT OVERVIEW GRAPH

Symmetry enables customers to quickly organize and display the relationships between datastores and identities in a functional and user-friendly graph.

IDENTITY INVENTORY

Detailed reporting on all identities in your environment including individuals, roles, and services that may have access to your sensitive data.

Discovered Identities
